WCOS38DLP 38MM WIRE ROPE CUTTER

SPECIFICATIONS

- Hydraulic Input
 - Pressure 210Bar (3000psi)
 - Flow up to 5Lmin
- Cuts up to 38mm wire rope
- Open sided to allow positioning along a rope length

DESCRIPTION

The open faced WCO38 cutting tools have been designed specifically for cutting into long lengths of wire rope in a crisp and simple action. The shear power of the cutter makes it suitable for cutting chain, steel sections and other hard materials. Designed without the need for a separate anvil this open cutter is particularly useful in confined spaces.

All tools are engineered from the highest quality alloys and are polished and nickel plated for added corrosion protection. This high quality construction requires little or no maintenance throughout its operational lifetime. Replacing the cutting blade or seals are simple tasks and the units can be shipped with a full compliment of spares.
